FREEDOMREI

SITUATION & KEY FINDING

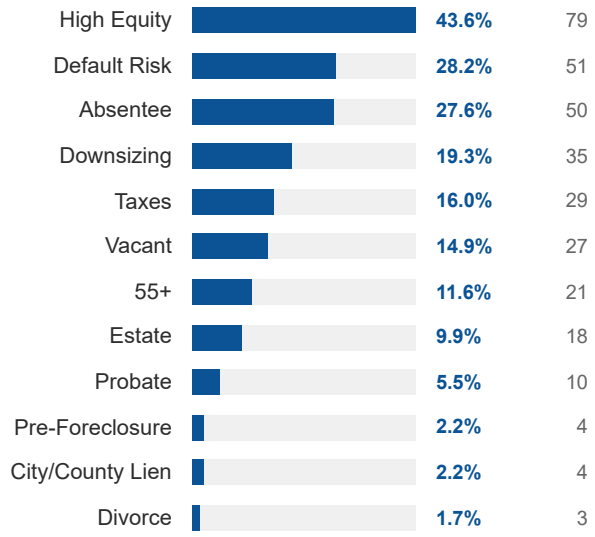
At FreedomREI's request, 8020REI reviewed 181 fulfillment properties confirmed sold between Jul – Dec 2025 — High Equity and Default Risk were the most consistently active signals at the time of delivery

PROPERTIES REVIEWED	COUNTIES	TOP SIGNAL	MULTI-SIGNAL
181	**5**	**43.6%**	**60%**
Sold within Jul – Dec 2025	Baker · Clay · Duval · Nassau · St johns	High Equity of all sold properties	Held 2 or more signals at delivery

Key finding: 96.1% of matched properties carried at least one active distress signal at delivery — and 60% carried two or more. Signal stacking is the pattern that defines a transacting property in FreedomREI's market.

Active Signals at Time of Delivery

Value = 1 at Marketing First Recommendation period. 181 matched properties.



Signal Stack Distribution

Active signals per sold property at delivery.

ACTIVE SIGNALS	PROPERTIES	SHARE
0 signals	7	3.9%
1 signal	66	36.5%
2 signals	66	36.5%
3 signals	33	18.2%
4 signals	8	4.4%
5 signals	1	0.6%

Important framing

High Equity and Default Risk appear most frequently because they are the largest distress segments in this market — not because they are uniquely predictive alone. Their value is as amplifiers: a property stacking multiple signals is a meaningfully higher-urgency target than any single flag in isolation.

SUPPORTING EVIDENCE

Duval and Clay show the same signal pattern — High Equity + Default Risk — confirming the finding holds across FreedomREI's active markets

County Breakdown — Matched Sold Properties

COUNTY	SOLD	SHARE	TOP SIGNALS
Baker	0	0.0%	No matched transactions this period
Clay	31	17.1%	High Equity 58% · Downsizing 32% · Default Risk 26%
Duval	140	77.3%	High Equity 40% · Absentee 32% · Default Risk 29%
Nassau	10	5.5%	High Equity 50% · 55+ 40% · Default Risk 30%
St johns	0	0.0%	No matched transactions this period

Note — Baker and St johns: No matched sold properties were recorded in these counties during Jul – Dec 2025. They are active in FreedomREI's BuyBox and included in the distress universe, but produced no transactions to analyse during this window. The repeat analysis scheduled for September 2026 will clarify whether this reflects a quiet period or a structural gap in that market.

Buyer Type — Who Purchased These Properties

BUYER TYPE	PROPERTIES	SHARE
Individual	132	72.9%

27% of matched properties sold to investor entities (company or trust). These buyers operate with pre-approved financing and dedicated acquisition teams — advantages that only close the window faster once a property is identified.

RECOMMENDATIONS

Acting on these findings now gives FreedomREI a direct path to more closed deals — prioritising the right signals, responding faster, and reaching motivated sellers before competing buyers engage.

1. Prioritise Signal-Stacked Properties First

Sort and work the fulfillment list by signal count, then by these validated combinations:

- **Tier 1 — Duval focus:** High Equity + Absentee + Default Risk. Any property carrying all of these is the highest-urgency target. Outreach within 48 hours of delivery.
- **Tier 2 — Clay focus:** High Equity + Downsizing. Work within the delivery week.
- **Tier 3 — secondary signals:** High Equity + Downsizing. Lower urgency, lower competition. Include as a weekly sweep.

2. Activate Rapid Response

The monthly delivery cycle means FreedomREI first sees properties 30+ days after they enter the market. Rapid Response adds a parallel, same-day channel when a property matching the BuyBox first appears in the platform — without replacing the current outreach workflow. It is the direct answer to the speed-to-contact gap investor buyers exploit.

3. Build Two Niche List Tracks (if VA capacity allows)

- **Track A — High Equity + Default Risk:** Large pool, validated signal combination. Consistent outreach cadence via VA.
- **Track B — Pre-Foreclosure (4 properties in this analysis):** Small universe, high seller urgency, low investor competition. Each property is more actionable precisely because the pool is small.
